Special Issue: Environmental and Health Aspects Related to the Production of Aluminium. A Collection of Papers Presented at the International Conference on the Environmental and Health Aspects Related to the Production of Aluminium, Bergen, Norway, 28–30 June 1994.

Preface 1

J.H. Vincent. Progress towards implementation of new aerosol industrial hygiene standards, with special reference to the aluminium industry 3

B. Mańkovská and E. Steinnes. Effects of pollutants from an aluminium reduction plant on forest ecosystems 11

E. Vike and A. Håbjørg. Variation in fluoride content and leaf injury on plants associated with three aluminium smelters in Norway 25

R. Horntvedt. Fluoride uptake in conifers related to emissions from aluminium smelters in Norway 35

A.K.M. Arnesen, G. Abrahamsen, G. Sandvik and T. Krogstad. Aluminium-smelters and fluoride pollution of soil and soil solution in Norway 39

I. Rodushkin, T. Moiseenko and L. Kudravsjeva. Aluminium in the surface waters of the Kola Peninsula, Russia 55

A. Ingólfsson and J. Svavarsson. Study of marine organisms round a cathode dumping site in Iceland 61

K. Naes, J. Knutzen and L. Berglind. Occurrence of PAH in marine organisms and sediments from smelter discharge in Norway 93

J. Knutzen. Effects on marine organisms from polycyclic aromatic hydrocarbons (PAH) and other constituents of waste water from aluminium smelters with examples from Norway 107

T. Vikøren and G. Stuve. Bone fluorine concentrations on Canada geese (*Branta canadensis*) from areas with different levels of fluoride pollution 123

H.J. Gitelman. Aluminum exposure and excretion 129

T.V. O'Donnell. Asthma and respiratory problems — a review 137

K. Schmid, J. Angerer, S. Letzel, G. Sturm and G. Lehnert. Use of bone mineral content determination by X-ray absorptiometry in the evaluation of osteodystrophy among workers exposed to aluminium powders 147

B. Schoket, M.C. Poirier and I. Vincze. Biomonitoring of genotoxic exposure in aluminium plant workers by determation of DNA adducts in human peripheral blood lymphocytes 153

J.O. Levin. First international workshop on hydroxypyrene as a biomarker for PAH exposure in man — summary and conclusions 165

J.O. Levin, M. Rhén and E. Sikström. Occupational PAH exposure: urinary 1-hydroxypyrene levels of coke oven workers, aluminium smelter pot-room workers, road pavers, and occupationally non-exposed persons in Sweden 169

C. Viau, G. Carrier, A. Vyskočil and C. Dodd. Urinary excretion kinetics of 1-hydroxypyrene in volunteers exposed to pyrene by the oral and dermal route 179
C. Viau and A. Vyskočil. Patterns of 1-hydroxypyrene excretion in volunteers exposed to pyrene by the dermal route 187
C. Viau, A. Vyskočil and L. Martel. Background urinary 1-hydroxypyrene levels in non-occupationally exposed individuals in the Province of Québec, Canada, and comparison with its excretion in workers exposed to PAH mixtures 191
Th. Göen, J. Gündel, K.-H. Schaller and J. Angerer. The elemination of 1-hydroxypyrene in the urine of the general population and workers with different occupational exposures to PAH 195
P.J. Boogaard and N.J. van Sittert. Urinary 1-hydroxypyrene as biomarker of exposure to polycyclic aromatic hydrocarbons in workers in petrochemical industries: baseline values and dermal uptake 203
Å.M. Hansen, J.M. Christensen and D. Sherson. Estimation of reference values for urinary 1-hydroxypyrene and α-naphthol in Danish workers 211
M. Ahmad and R. Narayanaswamy. A flow-cell optosensor for monitoring aluminium(III) based on immobilised eriochrome cyanine R (ECR) and reflectance spectrophotometry 221
